

FOURTEENTH YEAR.

PHOENIX, ARIZONA, MONDAY MORNING, AUGUST 17, 1903.

VOL. XIV. NO. 91

## AN ACCUSATION

Made by Bulgaria Against  
the Porte

## DETAILED STORY OF BLOOD

An Intimation That the Government  
Concludes That the Macedonian In-  
surrection Against the Porte Is  
Fully Justified.

Sofia, Aug. 16.—The Bulgarian government has presented a memorandum to the powers setting out at great length the conditions of affairs during the past three months in Macedonia since the Turkish government undertook to inaugurate the promised reforms.

The most precise details, dates, places and names of persons are given in the memorandum, the whole constituting a terrible catalogue of murder, torture, incendiarism, pillage and general oppression committed by Ottoman soldiers and officials. These particulars are obtained entirely from official sources. The Bulgarian government guarantees the absolute truth of every statement and challenges the porte to disprove a single charge made in the memorandum.

## JARRING THE PORTE.

Constantinople, Aug. 16.—The British ambassador has called the attention of the porte to the situation in Macedonia. He pointed out that grave results may attend the fresh murders of foreign subjects. The ambassador had an audience with the sultan on Friday.

## NEBRASKA CLOUDBURST.

A Town Flooded and Railroads Greatly Damaged.

Omaha, Neb., Aug. 16.—A cloudburst at Papillion, a few miles south of this city, early today flooded the entire town and caused extensive damage. The entire surrounding country was flooded and crops were almost entirely destroyed in the vicinity of the town.

The water ran over the Missouri Pacific tracks, causing delay to trains for ten hours.

## A MEETING OF CLOUDS.

Fairbury, Neb., Aug. 16.—Details have been received here of a cloudburst along the Nebraska-Kansas line for about eight miles. Two cloudbursts apparently met and for an hour the water fell in sheets. Estimates of the downpour are all the way from one foot to three feet. The water swept down Fair Branch and Silver Creek that are usually dry at this season, taking everything before it.

Not a bridge remains on Silver creek, and but one on Dry Branch. The residences were all built on high ground, which accounts for the fact that no lives were lost, although there were several narrow escapes. Dead stock and farm implements were found lodged in trees twenty feet from the ground.

## CAN'T FIND YOUNG COUPLE.

They Went Out Rowing at Canada Lake and Haven't Returned.

Utica, N. Y., Aug. 16.—George Evans of Johnston and Miss Florence Brown of New York City, guests at Canada Lake, near Gloverville, have disappeared and there is much conjecture as to their whereabouts.

Yesterday morning they engaged a skiff and rowed up Canada Lake to gather water lilies. They did not return by nightfall, and searching parties were organized to scour the shore line of the lake and adjacent woods.

One searching party came upon their boat. It was a cork, a sweater and one oar. The other oar was found floating in the lake.

Today the idea that the two perished has been succeeded by a well-defined belief that Evans and Miss Brown left their craft where it was found and traveled by way of Dolgeville to this city, where, it is reported, they were married this afternoon.

Diligent inquiry, however, fails to reveal any such marriage here. A significant fact in connection with the young people's disappearance was the arrival of Evans' fiancée at Canada Lake from Pittsburgh a few hours after he left in a boat with Miss Brown in a hunt for water lilies. Many cling to the theory of drowning, and say that Evans and Miss Brown were too slightly acquainted to have eloped.

## TOOK OUT A GIRL'S HEART.

Physicians Examined It, Found It Normal and Then Put It Back.

St. Louis, Aug. 16.—Surgeons at the city hospital today removed the heart of Alma Toomey, a thirteen-year-old girl, who had been stabbed by her lover, Thomas Barnes, laid it upon her breast, found it uninjured and replaced it. It is said to be the eleventh operation of the kind in the annals of surgery.

Fearing that the heart of the girl had been injured by the knife, Dr. Doyle, assisted by Drs. Riley and Clark, removed it with a pair of forceps, elevated it to view, and examined it for two minutes. No injury could be found and the heart was put back in its place with no apparent injury to the patient.

The operation was accomplished by cutting through two ribs and pushing the lung aside. A hole was found in the pericardium made by the man's knife, and after cutting about a half inch more, severing several minor arteries, the heart was ready to come out.

Dr. Doyle handled the forceps. The heart continued to pulsate regularly while it was exposed. After the heart

was put back the arteries which had been cut were bound up.

Barnes was arrested today and is now locked up. It is feared that the girl will die.

## NATIONAL G. A. R.

The Arrival of the Principal Officers at San Francisco.

San Francisco, Cal., Aug. 16.—While the formal exercises of the national reunion of the Grand Army of the Republic do not begin until tomorrow the encampment to all intents and purposes opened today with the arrival of General Thomas J. Stewart, commander-in-chief, on a special train bearing 35 members of the different Pennsylvania posts. Other distinguished arrivals today are General Nelson A. Miles and General John C. Black, who are most prominently spoken of as the next commander-in-chief.

## COLORADO CLOUDBURST.

Damage to Crops and Railroads Above Pueblo.

Denver, Colo., Aug. 16.—A special to the Republican says: Heavy rains and a cloudburst in the mountains last night damaged the railroads between Pueblo and Florence and washed out numerous crops along the valley.

At Beaver creek the water overflowed the Rio Grande tracks, washing away the approaches and destroying sixty feet of track. At Portland and Woodruff the Santa Fe tracks were badly damaged, the water flowing over them to a depth of several feet and leaving a sediment of six or eight inches and in several places washing away small bridges.

## THE KILLING OF A CHILD

The Alleged Murderer in Danger of a Mob.

Butte, Mont., Aug. 16.—A special to the Republican says: The body of a six-year-old boy named Buck, who it was believed had been abducted by a stranger two days ago, was discovered near here by a searching party. The lad had been made the victim of the most heinous crime.

The body was shockingly disfigured with a knife. This afternoon the coroner's jury returned a verdict that the boy had been murdered, and charged Walter Anderson of Missoula with being responsible. Anderson is now in jail at Hamilton. Citizens of Stevensville are highly wrought up over the affair, and it is said are preparing to lynch Anderson tonight.

## A PANAMA DISTURBANCE.

By the Time Word Reached Washington It Was All Over.

Washington, D. C., Aug. 16.—Mr. Herran, the Colombian minister, and Mr. Cromwell called on Mr. Loomis this afternoon. Neither had any information concerning the canal situation, but called to see whether any news had been received at the state department. A dispatch came during the day from Minister Baupre, but it related to the recent disturbance at Panama. Bogota had just learned on the 10th instant that the trouble was ended.

## NEGROES FOR THE NORTHWEST.

St. Paul, Minn., Aug. 16.—The Rev. J. F. Davidson of Tacoma is organizing a colonization movement among the negroes of the Northwest. He passed through St. Paul today with a party of twenty-five colored people from Louisiana, all of whom will take up lands in Washington state.

This is the vanguard, Mr. Davidson says, of a movement of colored people from southern cities to the farming lands of the west.

## NEBRASKA REPUBLICANS

Will Make a Strong Declaration for Roosevelt.

Lincoln, Neb., Aug. 16.—There will be no strife for places on the ticket to be named by the republican state convention on Tuesday. J. B. Barnes, the only candidate for associate justice, will be nominated by acclamation. There are five candidates for the two vacancies on the board of university regents.

## TO RESTRICT OPIUM TRADE.

Commission to Make a Thorough Investigation in the Orient.

Washington, Aug. 16.—Before any law regulating the importation of opium into the Philippines is adopted by the Philippine Commission, a thorough investigation of the subject will be made by a special board consisting of Edward C. Carter, chief of the Bureau of Public Health in Manila, Bishop Brent of the Philippine Episcopal church, and Dr. Albert, an official of the Philippine government.

A cable dispatch received at the war department today from Gov. Taft says that these men will leave Manila about Aug. 15 to visit such places in the Orient as may be necessary to a thorough investigation of the opium question.

They will go to Japan, Formosa, Shanghai, Hong Kong, Java, Singapore and Burma. Upon their return to Manila they will present a report to the Philippine Commission, recommending the best method to restrict the importation of opium, and if possible to restrict its importation except for medical use.

## DRIVEN TO SUICIDE

Stage Robber Who Attempted a Wyoming Jail Break

He Was Kicked and Beaten by His Jailors to Make Him Divulge the Name of the Man Who Gave Him a Gun.

## DECEY OF SPEECH

Talked About by President Roosevelt Yesterday.

Oyster Bay, L. I., Aug. 16.—President Roosevelt delivered the principal address at the quarterly meeting of the Society of the Holy Name of Brooklyn and Long Island, held here today. Decey of speech and conduct constituted the theme of his address, which was enthusiastically applauded by 2,000 persons, chiefly men.

## DIED ON WAY TO POORHOUSE.

Woman of Eighty Had Often Expressed a Dread of Going There.

Saratoga, N. Y., Aug. 16.—Mrs. Mary Corrigan, eighty years old, died today in a rooming house, having been taken to the Saratoga county poorhouse.

## MUMMY GETS IN FREE.

Philadelphia Appraisers Assessed It as Unenumerated Manufacture.

New York, Aug. 16.—The board of United States general appraisers has decided that an Egyptian mummy imported at Philadelphia is free of duty under paragraph 663 of the Dingley tariff act, which provides for "skeletons and other preparations of anatomy."

## ARMORED CAR TO BE EXHIBITED.

Omaha, Aug. 16.—What has been familiarly known as the Lincoln car has been sold by the Union Pacific, which owned it for 3½ years, and will be exhibited at the St. Louis exposition. It was built in 1894 at the military car shop at Alexandria, Va., and has an armor plate set between the outer and inner walls. After its completion it was used exclusively by the president, and his body was transported in this car to Springfield for burial. In 1895 it became the property of the Union Pacific.

## EFFEMINATE PREACHING

Ocean Grove Minister Says It Keeps Men Away From Church.

Ocean Grove, N. J., Aug. 16.—In his address before the Methodist Brotherhood this evening the Rev. Edmund J. Kulp of Red Bank declared that "effeminate preaching" was responsible to a large degree for keeping men out of the church. Said Mr. Kulp:

If the church is to attract men it must present those qualities that appeal to men. Using women as the ideal in pulpit illustrations has its rise in the Roman Catholic church, in its severity of the Virgin Mary. The picture, too, of Christ as an effeminate I often wonder how he pushed a plank or sawed a plank. His picture shows none of the quality of a clergyman's player. Our church literature, too, is also effeminate. I don't make the point that these things are wrong, but that they are unchristianized. They are too much like girlish bread, and can't stand the knocks of the world. The ideal virtues—patience, etc.—have been so much used in the pulpit that the practical man of the world feels that he is on the outside. The illustrations used in pulpits rarely come from the world's real life, the real burdens of the world.

Mr. Kulp made the point that the man who founds a good business, pays fair wages and deals squarely with all men is as much to be admired as the man who founds a hospital.

## RUNAWAY ENGINE'S WILD RACE.

Unmanned. It Dashes Down Steep Grades and Jumps the Track.

Caldwell, N. J., Aug. 16.—Crows came in from the surrounding country today to view the wreck of the big six-wheel freight engine that ran wild down steep grades from Essex Falls to Cedar Grove on the Caldwell branch of the Erie's Greenwood Lake division and then jumped the track.

The engineer and fireman left the locomotive at Essex Falls to help a brakeman with an unruly fat car and it is said that the engineer forgot to put on the reverse lever. When the air pressure was exhausted the machine started slowly at first, but soon with such speed that the engineer and fireman couldn't catch it. The engine rushed by the Caldwell station at a speed of forty miles an hour and had attained speed of seventy-five miles an hour when it crossed the bridge over the Pompton turnpike.

The engine finally jumped the track on a short curve near the trestle over the Pompton river and rained a shower of dirt into Webb Mitchell's chicken yard, killing fifty chickens. A piece of coal struck Mitchell's head and killed it and another smashed a watering can that Mrs. Mitchell was holding. The tender ripped a large oak up by the roots. The escaping steam from the engine, which was battered into a grotesque wreck, was heard for miles. The track was badly ripped up.

## GOVERNMENT CHEATED ON ICE.

Short-Weight Scales Alleged to Have Been Used by American Company.

Washington, Aug. 16.—Frauds, it is alleged, have been discovered in the contracts by the American Ice company for supplying ice to the various branches of the district government.

The scales of weights and measures of the district reported to the board of district commissioners today that the government was being defrauded fifteen pounds of ice out of every fifty pounds paid for.

An investigation has shown that the scales used by the company in weighing the district ice supplies are fifteen pounds short.

Commissioner West has ordered a rigid investigation of the case and has instructed the scales of weights and measures to make a report as soon as possible. The short-weight scales have been confiscated.

## TROLLEY CARS MIXED

Running Between Kansas City and Independence, Mo.

Kansas City, Mo., Aug. 16.—In a recent collision of two trolley cars tonight on the Independence-Kansas City line two persons were fatally injured, four seriously hurt, and half a dozen others sustained bruises and cuts. The cars were returning to Kansas City from Forest Park and were crowded with passengers. The trolley of the first car had slipped the wire and while it was being replaced the second car, running at a rapid rate, crashed into the rear end. The seriously injured were on the rear platform of the car, which was badly smashed.

## THE NEW PLAN OF FINANCING

Comes in for Criticism

Some of the Holders Do Not Want to Exchange Income for the Debentures.

New York, Aug. 16.—Some criticism is being passed in Wall street upon the recently announced plan for the scaling down of the bonded debt of the Mexican Central railroad and the issue of debenture bonds in exchange for the present income bonds. Some income bondholders have declared their intention of keeping the old securities, but, on the other hand, it is authoritatively announced that a number of large holders of income bonds have already deposited their holdings under the plan.

The incomes surrendered are to be kept alive, but the debentures will not depend upon them for returns, as the latter positively begin to draw interest from Oct. 1. The plan offers a return upon the investment, which, though small in comparison with the par value of the present security, is a certain charge against the company. The prospect for a payment upon the income bonds is said to be remote, and this interest is not cumulative.

To the objection that the plan cuts the par value of the securities down to about a fourth in the case of the first income, and an eighth in the case of the second income, it is answered that the company purposes to give \$240 par value for \$140 present market value in the one case and \$140 par value for \$90 present market value in the other case, friendly to the plan this is considered an equitable exchange.

It is also pointed out that the plan offers a bond maturing in 1908, which, being a debenture, is a note of the company and must be met before any other obligation can be paid. The incomes do not mature until 1910. The new debentures will mature three years before the consolidated debt of the company, which amounts to \$55,000,000. On account of their earlier maturity, the new debentures would have to be given first consideration in any plan of readjustment of the funded debt.

## THE DIAMOND CONTESTS

The Results of the Struggles in the Three Leagues Yesterday.

AMERICAN LEAGUE.  
First game—St. Louis; 6; Philadelphia, 3. Second game—St. Louis, 2; Philadelphia, 1.

First game—Chicago, 2; Washington, 0. Second game—Chicago, 3; Washington, 1.

New York, 8; Detroit, 12.

## WESTERN LEAGUE.

Omaha, 10; Milwaukee, 2. First game—Denver, 4; Kansas City, 4. Second game—Denver, 9; Kansas City, 6.

Des Moines, 5; Peoria, 6. Colorado Springs-St. Joseph, rain.

## AMERICAN ASSOCIATION.

First game—Kansas City, 8; Indianapolis, 3. Second game—Kansas City, 7; Indianapolis, 8.

St. Paul, 6; Toledo, 4. First game—Milwaukee, 5; Louisville, 1. Second game—Milwaukee, 2; Louisville, 2.

First game—Minneapolis, 5; Columbus, 2. Second game—Minneapolis, 11; Columbus, 13.

## WOMAN TO RUN ENGINE.

Passed Examination in Washington and Gets a License.

Washington, Aug. 16.—Mrs. Amasa Berger, the "woman engineer," got a license today to operate a stationary engine in the District of Columbia. She is the first woman who ever took the engineer's examination in Washington. She will run the engine which supplies the power for her husband's steam bakery.

## GRANITE DELLS BASEBALL.

Prescott, Ariz., Aug. 16 (Special).—The most exciting baseball game that ever took place in Arizona was played today at Granite Dells, Whipple against Iron King. The miners' team won by 7 to 5. The same team will meet next Sunday at Iron King.

## THE THREATENED FLOOD

It Is Not Seriously Feared at Kansas City.

Kansas City, Mo., Aug. 16.—Notwithstanding the fact that the Kansas river at this point has risen a foot in twenty-four hours up to 2 o'clock this afternoon, when it became stationary, and a further rise is expected tomorrow, no great damage is likely to result. The water level at Lawrence and Topeka, the Kansas river has risen slightly since last night, and at Salina and Junction City its tributaries, the Smoky Hill and Republican rivers, are rising at a steady rate and sending water this way. Most of this water will reach Kansas City within another twenty-four hours, but while a further two-foot rise is expected a fall from that time on is looked for. Traffic between the two Kansas cities is still suspended as the temporary pile bridges are unsafe.

## GOVERNMENT CHEATED ON ICE.

Short-Weight Scales Alleged to Have Been Used by American Company.

Washington, Aug. 16.—Frauds, it is alleged, have been discovered in the contracts by the American Ice company for supplying ice to the various branches of the district government.

The scales of weights and measures of the district reported to the board of district commissioners today that the government was being defrauded fifteen pounds of ice out of every fifty pounds paid for.

An investigation has shown that the scales used by the company in weighing the district ice supplies are fifteen pounds short.

Commissioner West has ordered a rigid investigation of the case and has instructed the scales of weights and measures to make a report as soon as possible. The short-weight scales have been confiscated.

## MEXICAN CENTRAL

The New Plan of Financing Comes in for Criticism

Some of the Holders Do Not Want to Exchange Income for the Debentures.

New York, Aug. 16.—Some criticism is being passed in Wall street upon the recently announced plan for the scaling down of the bonded debt of the Mexican Central railroad and the issue of debenture bonds in exchange for the present income bonds. Some income bondholders have declared their intention of keeping the old securities, but, on the other hand, it is authoritatively announced that a number of large holders of income bonds have already deposited their holdings under the plan.

The incomes surrendered are to be kept alive, but the debentures will not depend upon them for returns, as the latter positively begin to draw interest from Oct. 1. The plan offers a return upon the investment, which, though small in comparison with the par value of the present security, is a certain charge against the company. The prospect for a payment upon the income bonds is said to be remote, and this interest is not cumulative.

To the objection that the plan cuts the par value of the securities down to about a fourth in the case of the first income, and an eighth in the case of the second income, it is answered that the company purposes to give \$240 par value for \$140 present market value in the one case and \$140 par value for \$90 present market value in the other case, friendly to the plan this is considered an equitable exchange.

It is also pointed out that the plan offers a bond maturing in 1908, which, being a debenture, is a note of the company and must be met before any other obligation can be paid. The incomes do not mature until 1910. The new debentures will mature three years before the consolidated debt of the company, which amounts to \$55,000,000. On account of their earlier maturity, the new debentures would have to be given first consideration in any plan of readjustment of the funded debt.

## MISSOURI EARTHQUAKE.

St. Louis, Aug. 16.—An earthquake shock that lasted several seconds was distinctly felt in all parts of St. Louis at 3:53 this morning. So marked was the seismic disturbance that horses, stock and many persons jumped from their beds in fright. No damage is reported.

## KANSAS CITY MARKETS

A Review of Conditions and Prices Last Year.

Kansas City, Mo., Aug. 16.—Receipts at Kansas City last week were 4,743 cattle and 5,934 calves, about 7,000 more cattle than during the previous week. Market opened Monday strong to 10 cents higher, but began to decline Tuesday and closed the week 25 to 35 cents off on steers and 15 to 25 cents on calves. Cattle sold at 3.50 to 3.75. Calves sold at 3.25 to 3.50. Best native fat steers brought \$5.25 on Tuesday, and best western \$4.90, selling from that down to \$4.30. Western cows brought up to \$5.25. Best native fat steers brought \$5.25 on Tuesday, and best western \$4.90, selling from that down to \$4.30. Western cows brought up to \$5.25. Best native fat steers brought \$5.25 on Tuesday, and best western \$4.90, selling from that down to \$4.30. Western cows brought up to \$5.25.

Recent rains have helped corn prospects, and Missouri, Illinois and Iowa feed buyers were active at the point last week. Kansas usually comes in later. Speculators bought cattle at steady prices first of the week, but were forced to close out at a loss, as the country buyers last week were intent on making their cattle look as much like bargains as possible. Colorado sold from \$2.85 to \$2.70.

Yesterday there was 9,000 cattle on the market, nearly half on the Texas side. Fat steers are steady to 10 cents lower, cows steady, and stockers and feeders steady, on a good speculative demand. Most of the traders sold out close last week.

Sheep run was light last week at 17,000 head. Prices were steady on muttons, and 25 to 40 cents higher on lambs. The feeding end of westerns found quick sale, as not enough thin stuff is coming. Now the run is liberal at 7,000 head, and the general market is steady. Killers were hungry for supplies, especially lambs. Mixed sheep sold around \$3.40, wethers \$3.50, yearlings \$3.75, feeders \$3.00 to \$3.25, killing lambs \$4.75 to \$5.25 and feeding lambs around \$4.00.

Numerous buyers were here from country points within the past few days calling for range horses. Inquiries for broke stock could not be filled, and some carvers were taken instead. Plain to fair range horses bring \$15.00 to \$45.00, and the choicer grades from \$50.00 to \$75.00.

## A JAPANESE CO-ED.

Chicago, Aug. 16.—For the first time in its history Northwestern University will have this fall a Japanese "co-ed." She is Yoko Hejio, 18 years of age, and has come direct from her home in Tokio to enter the university. Her father, Count Ieyama Hejio, occupies a high office in Japan.

## WEATHER TODAY.

Washington, Aug. 16.—Forecast for New Mexico and Arizona: Fair Monday and Tuesday.

## A BICYCLE FOR THE ASKING

The largest and best line of new and second-hand bicycles in the city to be sold for cash or easy payments.

## PHOENIX CYCLE CO.

PHONE 2524

## NEW METAL SELUM.

Lighter and Stronger Than Aluminum and Costs Much Less.

Washington, Aug. 16.—The discovery in Germany of a new metal called selum by Edward Mollard, a Frenchman, is reported to the state department. The discoverer asserts that selum costs only one-twelfth as much as aluminum and is lighter and stronger. It does not rust and is therefore suitable for shipbuilding, for the manufacture of pipes and for railroad construction.

It is asserted also that, as it is capable of taking a fine polish resembling nickel, it would be desirable for cooking utensils. Its hardness is not quite equal to that of iron, but is greater than that of lead, zinc, etc. Its power of resistance is said to be greater than that of iron, but less than that of steel.

## TWO MINE WORKERS MOBBED.

Effort to Organize a Non-Union Settlement Rejected with Violence.

Birmingham, Ala., Aug. 16.—B. L. Greer, colored, vice president, and Joe Holler, white, organizers of the district organization of the United Mine Workers of Alabama, were mobbed today at Horse Creek, Walker county. Several white men, said to be employees of the company there, are charged with the assault. The camp at Horse Creek is non-union.

Greer and Holler had been to Emphise, nine miles from Horse Creek, to organize a local. They stopped on the way back at Horse Creek. The union leaders were ordered out of the place. Greer was beaten over the head. Holler was shot and seriously wounded.

## A. U. S. STEEL FIGHT

Between Strikers and Nonunionists in a West Virginia Plant.

Wheeling, W. Va., Aug. 16.—A clash occurred early today between the striking machinists and about twenty-five non-union men who took places in the Riverside plant of the United States Steel Corporation. The battle started on Saturday night. Despite the fact that more than one thousand shots were fired, there were no fatalities and only a few persons wounded.

The machinists have been on a strike for several weeks and the situation is becoming critical for the corporation imported about twenty men. The strikers last night attacked the boarding houses of the non-unionists. The houses were heavily barricaded and many volleys were fired into the structures. A signal well-directed shot from within the house wounded one of the strikers and he was carried away. Clay Hoover, a spectator, was also shot in the knee. A number of other persons in the buildings with the non-union men received wounds.

Tonight the strikers who are lying in the hills fired on Peter Slatek who was taking him for a spy. The man is seriously wounded.

## THE EL PASO MINE.

A Story That an Attempt Will Be Made to Resume Work on the Tunnel.

Colorado Springs, Colo., Aug. 16.—A special to the Gazette from Cripple Creek says a report is in circulation in this district to the effect that an attempt will be made to resume work on the El Paso drainage tunnel tomorrow morning, when it is feared that matters will be brought to an issue between the striking miners and non-union men.

It is hoped, however, that an agreement will be reached and that the miners in charge of the tunnel and the strikers providing for the completion of the tunnel.

## A PANIC AT PRESCOTT

Explosion of Flash Light Apparatus at the Congregational Church.

Prescott, Ariz., Aug. 16 (Special).—During a stereopticon exhibition tonight at the Congregational church the acetylene gas apparatus exploded and set the building on fire, when a panic followed. Several women were injured in trying to get out of the building.

Mrs. Ross, an elderly woman, was badly hurt. The operator was burned seriously. The building was partly burned. The fire was put out by cooler heads, who assisted the women and children out of the windows, while others rushed through the doors between which the exploding instrument had been placed.

## FIRE! FIRE! FIRE!

We were surprised to save so much stock, injured only by smoke and water.

These goods are now on sale at a temporary quarters at
